

## Inviting Designs with Intuitive Modularity

What would you call a family of casegoods with offerings so vast it can meet all of your desking, storage and conference room needs? We call it Transpire. Starting with rectangular and bow front desks, Transpire allows you to easily set the tone for your environment whether it's transitional and casual or contemporary and upscale.

Transpire casegoods help you build contemporary spaces that don't just look good. They look smart. Starting with a maintenance-free laminate construction and PVC edge that are even more durable than wood veneer, Transpire makes good sense in nearly any office environment. Its materials also make Transpire a more cost effective alternative that can be manufactured in less time than real wood furniture.

While its monolithic profile and metallic accents keep Transpire from ever being called traditional, an array of surface finishes and pull options make it easy to create a custom contemporary look for your space. In open plans, large spaces can be divided into more approachable work areas by using adjoining pieces with the same finish as a visual boundary. Coordinating finishes can also be used on different pieces of furniture to subtly differentiate between meeting or communal-use areas and those for individual work.

Transpire also allows you to select different finishes for the vertical and horizontal laminates of the same piece of furniture. Mixing wood-grain and solid color laminates adds visual interest to more traditional desking and storage configurations without making them appear trendy. For additional texture and depth, acrylic and glass can also be incorporated.

Regardless of the version you choose, Transpire's drawer and door pulls help you make the right

statement. An unassuming integrated pull is standard on Transpire, but four bolder styles can be also be specified. Applied hardware in silver or black provides the ideal contrast to light or dark finishes.

With its wide array of storage and desking solutions and expansive palette of finish and pull options, Transpire is ready to help you build the space of your dreams. All you need is your imagination.

In addition to its vast collection of furniture pieces, Transpire also offers unique accessories that add privacy and storage, allowing you to construct the ideal workspace. Desktop acrylic panels delineate individual spaces in shared designs, while returns with acrylic modesty panels feel light and airy without leaving occupants overexposed. Paper organizers and sorters create cubbies to keep work and materials for active projects close at hand, organized, and together for the next time they are needed.

Tackboards help you make the most of closed-back overhead hutches by giving you a spot at eye level for notes, calendars, reminders, or mementos. Closed-back hutches also create the ideal spaces for overhead paper sorter inserts and desktop paper organizers, while open-back hutches allow communication and light to pass through workspaces.

Reception desks, like the other desks in the family can be specified with a bow front or rectangular shape to unite public and private areas within the workspace. Reception desks can be easily assembled from ordinary desks by adding reception galleries. Galleries provide a countertop at standing height for customers that echo the desks straight lines or bow front. Reception returns also create customer service areas adjacent to desks.

### TRANSPIRE SURFACE FINISH OPTIONS

Transpire uses a low pressure laminate. The same laminate color will look different on a desk top using a high pressure laminate process. Therefore it is not recommended to blend product lines using the same laminates as on Transpire.
