

# OCCUPY™ Task Seating

## TASK CHAIRS & STOOLS

Make your presence known. To thrive in today's workplace you need to demonstrate vision and take bold action. OccuPY Task Seating helps you make a statement whether you are using it for intensive solo tasks or in a group setting.

Like a well-crafted opening salvo, the frame and mesh back are sure to grab attention, but the true value of OccuPY Task Chairs and Stools are revealed by the more subtle arguments they make.

Self-weighting mechanisms that calibrate reclining resistance to the user's weight, plush molded foam seats, and mesh backs that conform over the full length of the spine provide intuitive comfort. The task

chair and stool's height-adjustable seat and arms also ensure an appropriate fit for a wide variety of users, as does the stool's height-adjustable foot ring.

In addition to height adjustability, OccuPY's under-seat controls include a lever that allows the backrest and seat to tilt freely, or be locked out in one of four positions. A striking 5-star base with dual-wheel high-impact casters provides unsurpassed stability and ease of use on carpeted surfaces.

Wrapping these features in a sophisticated silhouette and subtly patterned Cool Grey or Black mesh makes them all the more memorable. The future is yours for the taking. When you decide to seize it, you'll find a ready ally in OccuPY.

A reinforced nylon frame supports the Cool Grey or Black mesh insert creating a bold visual statement from any angle.

OccuPY's mechanism adjusts the resistance to reclining based on the user's weight, eliminating the need for a tension control knob.

Height-adjustable arms offer a 2½" range to provide every user with a perfect fit for intensive tasks.

A 5-star base with a 26" diameter provides stability without making the chair or stool unwieldy.
